The Jollibee Group grew its revenues by 9.5% in the first six months of 2015 over the same period a year ago as it accelerated its store network expansion to 3,000 worldwide as of June 30, 2015. It opened 131 new stores worldwide of which 102 were in the Philippines, the highest store opening in the first six months of a year. These numbers compared with 84 new stores opened in the Philippines and 108 worldwide in the same period in 2014. The JFC Group had 168 more stores worldwide versus a year ago.

JFC's Chief Executive Officer, Mr. Ernesto Tanmantiong gave the following statement: "We are excited about our recent rate of store network expansion. We just achieved the 3,000th store milestone. We are on track to open at least 200 new stores in one year in the Philippines, the first time we will be able to do so. Historically, we were opening a hundred new stores per year in the country. We look forward to opening 300 new stores worldwide this year, also a first in our history with 100 abroad, the bulk of which will be in the People's Republic of China. The key drivers of our store network growth are strong same store sales growth and improved profitability and financial returns of our stores, built over the past two years across the brands and across different regions in the world, and increased capability of our organization particularly our network development group in the Philippines. We look forward to JFC's resurgence to double digit sales growth in the quarters and years ahead".

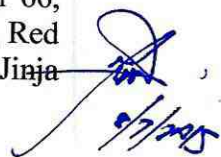

JFC's net income attributable to shareholders of the parent company grew by only 5.4% in the first half of the year with basically a flat growth in the second quarter of 2015 versus the same period a year ago despite a 9.5% increase in revenues. Higher raw material prices reduced profit margins while major investment spending on information technology, particularly on SAP implementation significantly increased general and administrative expenses.

JFC's Chief Financial Officer, Mr. Ysmael V. Baysa gave the following statement: "Raw material prices are declining; however, their benefits on profit margins have been offset by high level of inventories of materials with still high prices. We deliberately increased our inventories in the Philippines starting in 2014 as a safety measure during a major new system implementation, and as a way of dealing with the logistics and delivery challenges in the country. We look forward to resurgence to double digit sales and profit growth in 2016 and in the years ahead as we realize the benefits of improved profit margins, acceleration of store network expansion, stabilization of our information technology cost and higher profit contribution by our businesses abroad, even as all regions worldwide have grown their profit in the first half of 2015 versus a year ago. Meanwhile, our working capital improved significantly in the second quarter of 2015, bringing the Company back to a strong net cash level and in a position to fund major investments for long term growth."

Jollibee Foods Corporation operates the largest food service network in the Philippines. As of June 30, 2015, it was operating 2,374 restaurant outlets in the country: Jollibee brand 880, Chowking 422, Greenwich 219, Red Ribbon 349, Mang Inasal 459 and Burger King 45.
